

Nelson Jhoel Adarmes

PROFESSIONAL SUMMARY

Software developer with experience in technical operations, process automation, and web tool development. I have experience coordinating operations in an international production environment, collaborating with technical teams, vendors, and stakeholders across multiple countries.

I have developed internal tools using JavaScript, React, TypeScript, and Power Automate to automate processes, reduce manual tasks, and improve visibility of operational information. I use AI-assisted development tools to accelerate solution implementation, analyze code, generate technical documentation, and explore design alternatives.

I also work as a freelance developer creating Shopify store customizations. I complement my technical profile with visual design knowledge and basic Adobe Photoshop skills. I am interested in creating clear, consistent, user-oriented interfaces, combining design principles with front-end development. Currently pursuing a University Technical Degree in Programming at Universidad Tecnológica Nacional.

PROFESSIONAL EXPERIENCE

Operations Coordinator / Operations Support

NCR Atleos | November 2022 - Present

- Developed internal web applications for processing and analyzing operational reports using React, TypeScript, and JavaScript.
- Automated internal processes using Power Automate and Tampermonkey scripts.
- Developed scripts to extend corporate application functionality.
- Coordinated with technicians, vendors, and stakeholders across multiple countries.
- Analyzed operational data and optimized processes.

Freelance Web Developer

2025 - Present

- Shopify store customizations.
 - Interface adjustments and content organization using HTML, CSS, and JavaScript.
-

FEATURED PROJECTS

Operational Reports Analysis Dashboard

Web application to streamline processing and analysis of Excel-based reports, improving operational data visibility. Adopted by the entire Service Planners team and presented to the CLA Manager and regional operational teams.

Technologies: React, TypeScript, JavaScript

VEKA — Corporate Website (In Development)

Corporate website development for a strategy and communications consultancy. Site structure design, UX definition, interface development, brand guidelines adaptation, reusable components, responsive optimization, and direct client collaboration.

Technologies: React, Next.js, TypeScript, Tailwind CSS, Sanity CMS

Tools: Adobe Photoshop, Cursor AI

Weather App

Web application built with React and TypeScript that fetches real-time weather information via WeatherAPI. Asynchronous integration, JSON processing, city autocomplete, dynamic interface updates, and responsive design.

Technologies: React, TypeScript, JavaScript, CSS, REST APIs, WeatherAPI

Tampermonkey Scripts

JavaScript scripts to extend corporate applications: data collection automation, email generation, and repetitive task optimization. Developed in collaboration with operational leadership.

Technologies: JavaScript, Tampermonkey

Power Automate Internal Automations

Internal process automation to reduce manual work, improve efficiency, and streamline operational workflows.

Technologies: Power Automate

EDUCATION

University Technical Degree in Programming

Universidad Tecnológica Nacional | Argentina

August 2024 - August 2026

CERTIFICATIONS

- EF SET English Certificate (C1) — October 2025
- Ready To Work — British Council — March 2024
- Programming in C++ — Quark Academy — March 2023
- LinkedIn Learning: Developing Cross-Cultural Intelligence, Customer Service Foundations, Interpersonal Communication, Communicating Across Cultures, and 10+ additional courses

TECHNOLOGIES

Frontend: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS (intermediate)

Frameworks: React, Next.js (basic)

APIs: REST API integration, JSON processing

Automation: Power Automate, Tampermonkey

AI-Assisted Development: ChatGPT, Cursor AI, Claude, Gemini

Design: UX/UI, Adobe Photoshop (basic), GIMP (basic)

Tools: Git, Excel, Android Studio (basic)

Backend (basic knowledge): C#, C++, Java, ASP.NET, SQL

LANGUAGES

- Spanish: Native
- English: C1 (Advanced)
